

Emmanuel College Domains of Knowledge (General Requirement) Course Fulfillment Guidelines

Courses that fulfill the Domains of Knowledge requirements exposed students to various disciplines within the liberal arts and sciences, allowing them to “develop wide-ranging knowledge that makes possible engagement with and curiosity about significant knowledge, ideas and issues.” (Emmanuel College 2017-2018 Academic Catalog, p. 7)

This document is not all encompassing, but may be used as a guide in determining what transfer courses may be eligible to fulfill the Domains of Knowledge. Courses that are evaluated as the equivalent to an Emmanuel course will be awarded the Emmanuel course equivalency. Courses that do not have a direct equivalent at Emmanuel, but meet the criteria for the Domain of Knowledge will be awarded the general domain of knowledge fulfillment.

Courses that fulfill Domains of Knowledge (general requirements) are:

- Typically at the introductory level (100/1000 or 200/2000 level). Remedial/Developmental courses may not fulfill domains of knowledge and are not accepted at all for transfer credit. Courses that are at the 3000 level or viewed as upper level courses do not fulfill general requirements.
- Courses that are broad in scope or considered “introductory” may fulfill a general requirement. Courses that are “broad in scope” may refer to geographical region, time frame, or a survey of various works (artists, authors, etc.) within a certain time frame or genre (Examples: Intro to Sociology, World History I). However, courses where the subject matter is narrow in focus generally do not fulfill general requirements (Examples: History of Boston, Politics in the 1960s)
